- 2 **Quick and easy navigation**  
You can add favorite forms - **A simple way to save time.**
- 3 **A schema field**  
**Drawings** made in Kizeo Forms will have **various modification possibilities** do not be afraid to go wrong!

# Prior recommendations

To make your experience of using this beta-test easier, we're attracting your attention on some simple rules of use which is essential to proceed:

**>As long as the information is not sent to our servers you will not be able to find it on both versions of the application.**

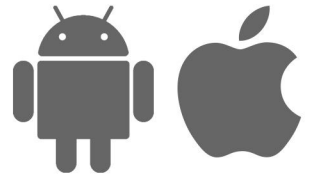

*For example: if you start a Draft on the current version of Kizeo Forms, you will not be able to find it on the beta test as long as you have not sent it. The same goes the other way!*

**> You will receive all your data transferred on the latest version of the Kizeo Forms application you have open.**

*For example: if you send a "Push" to one of your employees, who has on his smartphone the test version and the normal version of Kizeo Forms, he will receive it on the last version of the application that was open.*

# Instructions

## From an Android or iOS device

1

### **Step 1 : The Admin of the Kizeo Forms account must oblige to test**

The Administrator of the Kizeo Forms account at your enterprise must click on the participate button on the online platform: <https://www.kizeo-forms.com/betasubscription.php> to allow all users of the account to test the new version.
